Grape Float Floating Lift Station Degreaser

A degreaser and deodorizer designed specifically for wastewater processing. Contains a unique grape scent for covering malodors often associated with sewage.

A floating type of degreaser. It contains no acids and is alkali-free. Non-freezing. May be used year-round. Designed to clean lift stations, eliminate grease balls, and keep digesters from sticking.

This specialized formulation is a floating solvent system possessing degreasing and deodorizing properties. With a powerful, long-lasting grape fragrance, this product cleans vertical surfaces in lift stations, wet wells, and similar treatment facilities. Add it directly to wet wells, and it cleans and degreases as the water level fluctuates. It also "seals" offensive odors by containing odors emitted from lift stations. Grape Float makes an excellent general-purpose degreaser and asphalt release agent.

Lift Stations: Switch to manual operation, pump completely down, and add 20 gallons of **Grape Float** for every 500 gallons in the lift station. Let it rise to the maximum, then switch back to automatic operation.

Digesters*:* Add 20 gallons of Grape Float per foot of scum, then let sit for 20 minutes. Agitate or recirculate the digester.

Trickling Filter: Simply apply with a sprayer.

Overall Plant*:* Drip into influent at the rate of 1/2 to 1 1/2 ppm.

- **Floating Action:** The non-emulsifying formula stays on top of the water instead of mixing completely into it, riding the water level up and down
- **Wall Scrubbing:** As the liquid level fluctuates during pump cycles, it physically contacts and breaks down grease rings and scum on the wet well walls.
- **Odor Control:** It creates a cap over the surface that locks in anaerobic sewage gases and leaves a heavy grape scent behind.

Physical Properties

Form: — Liquid

Odor: — Grape

Color: — Colorless

Clarity: — Clear

Sediment: — None

Stability: — None

Cold Stability: — Not Affected

Boiling Point: — 307 F

pH: — N/A

Specific Gravity: — 0.77

Pounds/Gallon: — 6.4

Foaming: — Low

Flash Point: — 135 F

Applications

Lift Stations

Digesters

Trickling Filters

Areas of Use

Municipalities

Manufacturing Plants

Industrial

What is a Floating Lift Station Degreaser

Quick answer: A floating lift station degreaser is a liquid that sits atop your wet well, sealing in odors and releasing a more pleasant scent. **Grape Float** prevents sludge buildup, helping protect against fat, oil, and grease (FOG) accumulation on wet well walls.
