

# MONOBOR-CHLORATE

## NON-SELECTIVE GRANULAR WEED & GRASS KILLER

- Completely effective, single-application grass & weed killer which quickly and easily eliminates all vegetation including weedy grasses, annual and perennial weeds
- Keeps property weed-free all year. Use it on parking and patio areas, asphalt and gravel driveways, along fences,, around buildings or wherever there is a weed problem
- Has contact action (when used as a spray), plus deep-root kill when used either a spray or dry.
- Easily applied -straight from bag to soil or gravel. Can be used with any spreader suitable for granular application
- Can be dissolved in water and used as a spray. An ordinary garden sprinkling can, will do.
- May be used any time of year. Best results are obtained when applied just prior to plant emergence or when weeds & grasses are young and succulent.
- Is highly soluble, easily dissolved and readily absorbed by the soil when application is followed by light rainfall or artificial sprinkling.

Use Monobor-Chlorate on industrial sites or on similar non-cropped areas. Apply dry or as a spray for control of general vegetation and for prepaving treatment.

For dry application, conventional herbicide spreaders may be used. Cyclone type spreader may also be utilized.

For dry application apply  $\frac{1}{2}$  to 2 pounds per 100 sq. feet. The lighter application should be used at the time of weed emergence on moist soil or when precipitation is anticipated, while the weeds are still young.

For use under asphalt paving – for use as “Pre-paving” residual Herbicide under asphalt paving, to prevent pre-mature break-down of paving due to weeds: Apply at 2-4 pound per 100 sq. ft. to the finished subgrade.

Available in 50 -lb. bags
