REMEDiate

Grease Attacking Bio-Cleaner

REMEDiate is designed to clean grease, grime, spoiled food, vomit, urine, feces and other organic spills on kitchen and restroom floors. It is safe to use on all surfaces that cannot be harmed by water. Its unique formula contains selected strains of natural enzyme-producing bacteria. These special strains of bacteria are efficient at digesting organic waste to eliminate odors at their source.

Use on Kitchen and Restrooms – Floors & Walls:

- Concrete, Quarry Tile, Ceramic Tile, Brick and Grouted Floor Surfaces
- Designed especially for use on porous hard surfaces in kitchen and restroom areas.
- Bacteria in the formulation break down and digest oily grime.
- Environmentally safe formulation.
- Deep cleaning action removes grease and grime below the surface to make quarry tile floors (and grout) more slip resistant.
- Dissolves organic waste on floors leaving a more sanitary condition.
- Recommended for use in food service areas, food preparation areas, restrooms and showers in schools, hotels, hospitals, nursing homes.
- Biologically engineered bacteria / enzyme combination continues working to consume grease, grime and urine deposits.
